

Insurance Discovery

Identify up to 20% more billable coverage and recognize up to 12% increased revenue!

Myndshft Insurance Discovery utilizes innovative technology to explore every coverage option and payer source for patients. Intelligent algorithms search patient specific information for more than 2,000 payers, clearinghouse databases, and direct connections infrastructure to find more active coverage for healthcare billers.

Accurately identify the availability of government payers and their managed care or replacement plans, or commercial coverages, associated policy and subscriber numbers along with payer and patient specific Prior Authorization requirements.

Capabilities

 Find missing demographics and active coverage

 Identify the correct responsible party the first time

 Identifies additional payer PA requirements

Benefits

 Identify active coverage and payer specific benefits for more patients

 Maximize revenue by tapping other payer coverage opportunities

 Reduce operational costs with increased margins. Minimize write-offs and third-party agencies
